Bayesian linear regression

Jingchen (Monika) Hu

MATH 347 Bayesian Statistics

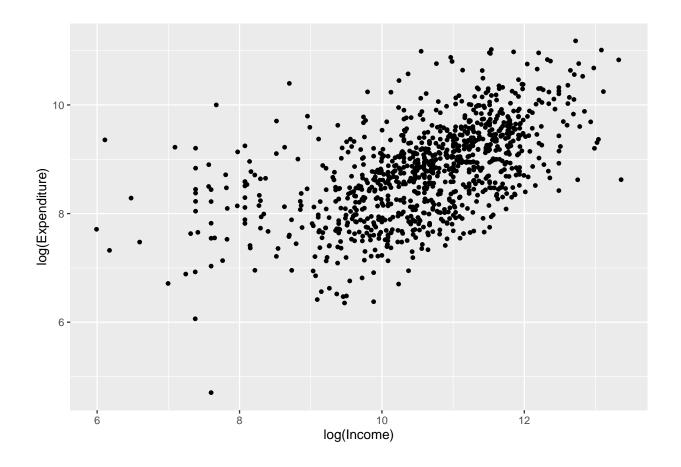

Installing the necessary packages

```
install.packages("devtools")
require(devtools)
devtools::install_github("bayesball/ProbBayes")
require(utils)
require(ggplot2)
require(gridExtra)
require(ProbBayes)
require(tidyverse)
crcblue <- "#2905a1"</pre>
```

Introduction: Adding a continuous predictor variable

The simple linear regression model

```
library(readr)
CEData <- read_csv("CEsample.csv")</pre>
## Parsed with column specification:
## cols(
##
    UrbanRural = col_double(),
    TotalIncomeLastYear = col_double(),
##
##
    Race = col_double(),
##
    TotalExpLastQ = col_double(),
    log_TotalIncome = col_double(),
##
    log_TotalExp = col_double(),
##
    Rural = col_double()
##
## )
g1 <- ggplot(CEData, aes(x = log_TotalIncome, y = log_TotalExp)) +
  geom_point(size=1) +
 labs(x = "log(Income)", y = "log(Expenditure)") +
  theme_grey(base_size = 10, base_family = "")
g1
```

The CE sample

A simple linear regression for the CE sample

MCMC simulation by JAGS for the SLR model

 ${\bf JAGS}$ script for the SLR model

```
modelString <-"
model {
## sampling
for (i in 1:N){
y[i] ~ dnorm(beta0 + beta1*x[i], invsigma2)
}

## priors
beta0 ~ dnorm(mu0, g0)
beta1 ~ dnorm(mu1, g1)
invsigma2 ~ dgamma(a, b)
sigma <- sqrt(pow(invsigma2, -1))</pre>
```

```
}
"
```

• Pass the data and hyperparameter values to JAGS:

• Run the JAGS code for this model:

```
## Calling the simulation...
## Welcome to JAGS 4.3.0 on Sun Nov 24 21:04:09 2019
## JAGS is free software and comes with ABSOLUTELY NO WARRANTY
